

## Additional Accessories 其他附件

### Frame Joint 加强筋

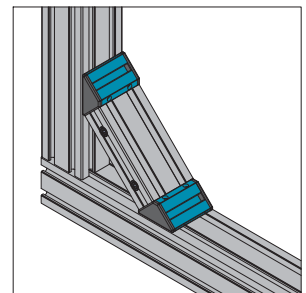

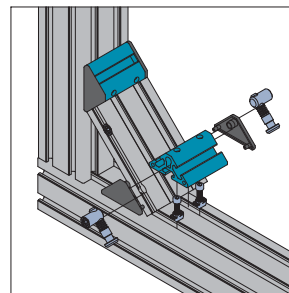

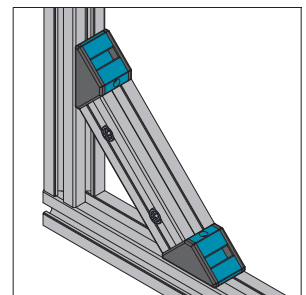

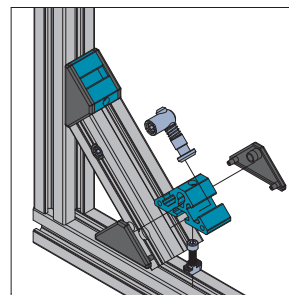

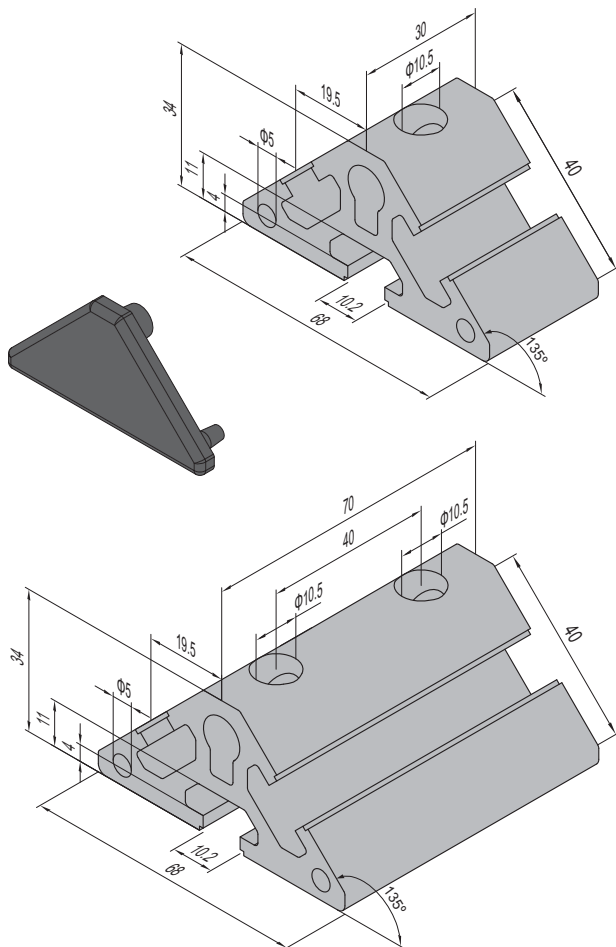

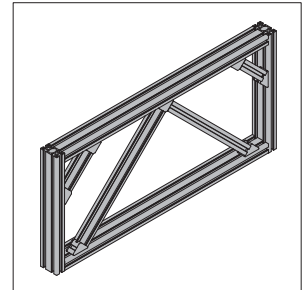

In the case of self-supporting lengths and dynamic alternating loads, bracing elements should be added due to the material combination of aluminium. These can be angle brackets, bracing plates and cross beams usually used in frameworks.  
型材框架跨度较大时，因自重载荷产生少许形变，使用专用连接件进行交叉连接，增加框架可靠性。

Material: aluminium profile 6063-T5, anodized (cutting end not anodized).

材质：铝合金 6063-T5，表面阳极氧化(切面无处理)。

End cap: black ABS

扣盖颜色：黑色
